90% of traders lose money every year.

8 steps to go from 0 to trading success:

1. No trading edge No money

- You can't win without a trading system
- Your system is your most important trading weapon

Find edges. Create rules. Build plans.

2. Edge + Confidence = No limits

The best system in the world is useless without the confidence to execute it

Build confidence:

- Win trades
- Reduce your risk
- Backtest your system

If you can trade fearless, your potential will be limitless.

3. Follow the laws of trading

- Plan your trades in advance
- Follow your rules
- Review your trades
- Learn from your mistakes

Every successful trader is a disciplined trader.

4. Trading success is 99% experience

- Losses, mistakes and failures are the best trading teachers
- Every day you learn new things
- 1 year of active trading is better than 10 years of reading books and watching videos

Show up. Trade. Learn. Repeat.

5. Think in probabilities

- Trading is not a 100% certainty game
- Everyone can win the next trade. Everyone can lose the next trade.
- Your edges won't work every time
- It's not about how many trades you win, but how much you win

Be a trading casino, not a gambler.

6. Risk management is the best defense

- #1 priority = survive
- You can win for 300 days, but lose everything in 1
- Study and improve WR and RRR

Trading success = Edge + Probability + Risk management

7. The most important trading skill

You can't win if you can't:

- Wait for your setups
- Wait for your trades to develop
- Wait for your success along the way

A trader who mastered patience is already halfway through trading success.

8. Become a successful trader

- Find an edge
- Build confidence
- Build discipline
- Follow your rules
- Get experience
- Think in probabilities
- Control your risk
- Develop patience
