- **LLY (bull quiet)**
- **DHR (bull quiet)**
- MDT (neutral)

Focus

Once we've identified which sector we are playing in and which stocks are in play we can narrow our watchlist down to the few stocks to look at and ignore the rest

We don't need an opinion on EVERY STOCK at every moment

Do this for all stocks in each sector

For each sector that is in Bull Quiet find each stock within that sector that is also in bull quiet

This removes a LOT of confusion and allows you to focus on a handful

You can do this on a daily or weekly basis

I prefer to do this over the weekend and setup my next week

Up next

The actual setup
