Fry Pan Bottom

Fry Pan Bottom

- The downtrend starts waning with the appearance of small trading bodies.
- As the trend starts slowly curling up, a gap up in price indicates that strong buying sentiment has now returned.

Cradle Pattern

Cradle Pattern

- The Cradle Pattern is a symmetric bottom pattern that is easy to identify.
 - A downtrend becomes obvious with a large black candle at the bottom.
 - A series of small or indecisive trading days trade in a flat area.
 - A bullish candle, more powerful with a Bullish Engulfing signal, is formed of approximately the same magnitude as a Bearish candle at the end of the downtrend.
- This signifies that the Bulls have come out of the indecisive trading area with decisive force.

Jay Hook Pattern

Helps to differentiate between profit taking and a full-scale reversal

Jay Hook Pattern

Jay Hook Pattern

- The first move of the uptrend is very strong.
- A candlestick sell signal indicates a pullback about to occur.
- After a few days, small indecisive candles start to appear
 - Doji, small Hammers, Bullish Engulfing signals

Jay Hook Pattern

Jay Hook Pattern

- The first test becomes the recent high
- Indecision as found in candlestick sell signals at the recent high becomes a quick indicator to get out of the position
- A Bullish candle breaching the recent high illustrates that investor sentiment is taking prices up

Scoop Pattern

Scoop Pattern

- An extended flat trading area
 - Followed by a pullback
- Buy signals bring price back up to flat trading range
- Once price breaks above flat range, look for strong uptrend

Scoop has expected results

DWA Inverted Scoop

Belt Hold Pattern

Belt Hold Pattern

- Strong prevailing trend
- The candlestick body should be the opposite color of the prevailing trend
- Gap on the open, continuing the trend
- The open is the high or low of that trend
- The length of the body should be a long body.

KERX - two weeks ago

Trading Gaps

- Gaps represent enthusiasm to get into a position to the point that investors will pay prices away from any of the previous day's trading range.
- Great for identifying panic selling at the bottom and exuberant buying at the top.

TRADING GAPS

What is the definition of a GAP?

- Gap or 'window' occurs when there is a 'gap' in price within a specific time frame.
- In a rising chart, it illustrates prices opening higher than previous trading range. The buyers have stepped in with great enthusiasm.
- In a declining chart, it illustrates prices opening lower than previous trading range. The sellers are getting out at any cost.
