

Day 6 — Level Marking & Market Structure Vision

Goal Today:

Train your eyes to **see strong support & resistance** clearly
No execution. No prediction. Only **observation skill**.

Why Day 6 Matters

If you can't **see levels properly**,
you can't trade springboards, reversals, or breakouts.

Good entries come from good levels.

Today we build the foundation.

1 Chart Setup (Simple Rules)

Open any chart:

- Index / Stock / Crypto
- Timeframe: **Daily**

 No indicators

 No strategy

 Clean naked chart only

2 Task 1 — Mark Only MAJOR Levels

Mark:

- **2 Strong Supports**
- **2 Strong Resistances**

How to identify STRONG levels:

- ✓ Price reacted **multiple times**
- ✓ Clear bounce or rejection
- ✓ Big candles moved away from level
- ✓ Not too close to each other

Less levels = More clarity

3 Task 2 — Zones, Not Thin Lines

Do NOT draw a thin line.

Draw a **ZONE**:

- Where price reacted earlier
- Where buying/selling was strong

 Price doesn't respect exact numbers
It respects **areas of interest**

4 Task 3 — Observe Market Memory

Ask yourself:

- Did price **bounce multiple times** here?
- Did price **reject strongly** here?
- Did price **pause before moving away**?

Write this sentence in your notes:

“Price reacted here before — it may react again.”

This builds **market memory understanding**.

5 Task 4 — Avoid the Middle of the Range

Mark this mentally:

 Middle = No trade zone

 Middle = Confusion zone

Professionals trade **edges**, not middle.

6 What You Should NOT Do Today

 No buying

 No selling

 No predicting

 No excitement

You are **training your eyes**, not your ego.

Day 6 Homework (Mandatory)

Step 1

Pick **1 chart** (Nifty / Bank Nifty / Any stock)

Step 2

Mark:

-  2 Strong Supports
-  2 Strong Resistances

Step 3

Write answers:

1. Why is this support strong?
2. How many times price reacted?
3. Why is this resistance strong?

Day 1 Mindset Rule

“Today I am not a trader.
Today I am a **chart student training my eyes.**”
