

Course Review: Risky Business by TradeSmart University

Instructor: Alphonso Esposito

One line Review: If you go through this course You Would become a “Master of Risk Management”.

This is a Small Course divided into only 4 Modules.

Module 1: Managing Risk

Module 2: Using R With Options And Risk Practicum

Module 3: Mastering Trade Management

Module 4: Practicum

Module 1- deals with Psychology of Risk, and the Concept of ‘R’ units. Measuring the Risk involved in a Trade and then trading the ‘R’ according to your Trading Strategy.

Module 2- Explains the concept of ‘R’ Units in relations to Options trading.

Module 3- Tackles the subject of Trade Management.

Module 4- Practical application of above 3 classes in form of Student’s interview.

The Concepts of ‘R’ Units, Compounding ‘R’ Units and Trader Progression Plan are worth watching and making note of in order to implement them in your trading.

In the Module of Trade Management there are 4 approaches discussed for managing the ongoing Trades once your Entry Triggers.

The Benefits and importance of Risk management is known to Every Trader, But this is the very thing that sets apart a consistently profitable trader from not so consistently profitable traders.

You might have an ultimate strategy up your sleeves with an awesome win rate however without proper Risk management that awesome strategy will also not make you consistently profitable.

Alphonso Esposito is a day trader himself; he has explained the concepts of risk management in a very practical way which is easily understandable. The strategies he used in trading have a 50% win rate. Yet he is consistently profitable- all because of Risk management.

My advice- Just go through this course and who knows- you might find your “Holy Grail”.
