let me post some 100 #fibbonaci number wonders on long term chart.

Post your chart too with #fibbonaci, make sure chart is clean.

this is number 1 in list

#ibrealestate

in 2021 it was one of the hot stock - Infact I was also excited took entry at top despite I was seeing Golden ratio rejection.

what happened next is history.

the very same stock took eyeball again few months back -- people went gaga
even we went long -- but exited sharp at 61.8%

checkout the result
#Fibbonaci

such setup forms rarely

#stronguptrend

#breakoutretest of inverse H&S and at retest 61.8%

that too hammer

mind it -- hammer works best in strong trend pullback.

#polycab

again many times discussed in my webinars.

when upmove in IT stocks started in SEPT 2022 -- Infy being darling stock was most talked and was said this time gap will fill

Check both charts

#INFOSYS

#Infy

lets see today #ITindex meltdown with the eyes of #fibbonaci

#sunpharma

how you are going to understand -- stock has changed trend or not?

simple answer - if on higher TF HL --HL formation start
u can understand

how u will be dead sure now strong momentum and new high is abt to come?

Check price behavior's at 61.8%

Golden ratio act as an imp base.

check this out

I was tracking this stock from many days

check both charts

Trend to badalna hi tha.

#Auropharma

my recent explanation on #KPIT fibonacci

remember sometimes price doesn't come exactly at 61.8% after 1st test but when price action gives u support -- never hesitate in going long.

With my understanding and experience I can say now we wont see 730-740 levels in #mcdowell

Stock was well discussed by me on youtube channel. Fibbonaci is just a strong supporting number which tells trend mind resume or accelerate.

in this case multiple test said -- Initial trend retracement is done and now lets start new journey chart 2 -- now what does chart 2 tells ?

chart 2 tells -- either this 61.8% becomes strong support and if price will extend by taking support which it shd as per my understanding price will hit previous high..

once that will be achieved - 200dma and 61.8% will coincide at one level.

#Mcdowell

```

get_moments(x, 11) # 2 (823.20 - 888.30) - 244.50 (36.30 - 16.30) + 873.
# 2.70000
get_moments(x, 5) # 2 (36.30 - 16.30)

```

```

getenv("PATH") |> str_c("C:\\Program Files\\Microsoft Windows\\Windows Defender\\",
  "Microsoft Defender Security Center\\") |>
  str_c("Microsoft Defender Security Center\\") |>
  str_c("Microsoft Defender Security Center\\")

```

#adaniport

when u want to trade a news driven stock - better look for higher time frame confluence

61.8% and support coincide.

check both chart for better understanding

<https://www.tradingview.com/x/IsCCDo0z/>

very interesting- Just saw @suru27 #marksons tweet.

Saw chart

1) stock was in corrective phase after 2020- massive upmove.

2) retraced till 61.8% and formed a hammer

3) lower high formation turned into higher low after breaking swing.

trend changed and stock now back to 52 week high.

discussed this in webinar -

61.8% is acting as support

#caplin

Technical analysis published on TradingView.com, Apr 05, 2022 15:18 UTC+9:30

Display format: JAPAN, currency: JPY, base: 1000000, 1.75% (1.75%), 1.75% (1.75%), 1.75% (1.75%)

TradingView

the thing is Price action is a leading Indicator - It tells u support and resistance but does support and resistance tells u where next move can come?

Infact nothing tells that - we can only guess what can happen next by the help of

1) trend

2)fibbo extension

if trend is bearish and price has first time retraced to golden ratio- trust me it will respect the primary trend(vice versa)

so whats most Imp is -- #Trend

before anything try to understand whats the trend my friend.

#niftyIT

now when price will start reversing from here - just saying-- and will break 61.8% -- we can anticipate the price will break major trend 61.8% and will reverse the bearish trend to bullish.

this was case 1

<https://www.tradingview.com/x/uNE3pyaq/>

case two which seems more likely
price retrace till 61.8% as per chart and then start uptrend again.
