Nifty Nifty, Bank Nifty & Stocks Intraday Setup

Directional Trading Strategy = Price Action + Bollinger Bond

A Complete Strategy for FREE :

1] Bollinger Bend :-

I have used Bollinger Bend to identify which direction the price is trying to move in a 15-minute timeframe for intraday trading

Bollinger Bend is the best intraday tool to identify the market direction

2] We will identify the right Setup

It's a mix Setup of Double Bottom & Bollinger Band

First, we will wait for a Sharp fall in price & Complete Candle Should be outside the Bollinger band

3] After the recovery stock price start falls again

Make a second bottom that should be below the first bottom

We will wait for a Hammer candle formation

Let's see some examples

4] Buy Setup:-

- ✓ Outside candle from BB
- ✓ Price recovered from that point & started to fall again from 2nd Bottom
- ✓ 2nd Bottom should be below the first bottom
- ✓ hammer Candle formation entry should be high of Hammer candle

Example-01:- Reliance 15 Min Chart

Here you can see a clear sharp fall of one candle clear outside the Band

Start recovery from that first bottom after that point

Stock falls again & makes second bottom with Hammer Candle

Stop Loss & Risk Management:-

- ✅ Stop loss should be low of hammer candle
- ✅ Target is 1:2 if you take 1 rupee risk on a particular trade you target should be 2 Rs
- ✅ Not take more than 1% Risk of your capital on a particular trade

Example-02:- Bosch 15 Min Chart

Here you can see a clear sharp fall of one candle clear outside the Band

Start recovery from that first bottom after that point

Stock falls again & makes second bottom with Hammer Candle
