VISION**

THE SCIENCE OF MINDSET

Mindset is absolutely the most important component to success. The person that has mastered their mindset will undoubtedly become successful as a trader, and in life.

1. Mindset is paramount to success
2. Use the "Science" of Mindset to bring success
3. Proactively work toward your vision in an efficient manner

Changing Our Mindset

Carol Dweck, world-renowned Stanford University psychologist, talks about the power of our mindset or our beliefs (especially around challenge). We can either have a Fixed Mindset where we let failure (or even success) define who we are, or a Growth Mindset where we see setbacks as opportunities to grow and improve ourselves. Just like how we learned how to walk... there are many stumbles along the way, but to reach our potential and live the life we desire, it takes practice and perseverance. We always have a choice about which view we adopt for ourselves... and it's never too late to change. What's your view?

It's up to you!

FIXED MINDSET

Belief that my intelligence, personality and character are carved in stone; my potential is determined at birth

GROWTH MINDSET

Belief that my intelligence, personality and character can be developed! A person's true potential is unknown (and unknowable).

DESIRE	Look smart in every situation and prove myself over and over again. Never fail!!	Stretch myself, take risks and learn. Bring on the challenges!
EVALUATION OF SITUATIONS	Will I succeed or fail? Will I look smart or dumb?	Will this allow me to grow? Will this help me overcome some of my challenges?
DEALING WITH SETBACKS	"I'm a failure" (identity) "I'm an idiot"	"I failed" (action) "I'll try harder next time"
CHALLENGES	Avoid challenges, get defensive or give up easily.	Embrace challenges, persist in the face of setbacks.
EFFORT	Why bother? It's not going to change anything.	Growth and learning require effort.
CRITICISM	Ignore constructive criticism.	Learn from criticism. How can I improve?
SUCCESS OF OTHERS	Feel threatened by the success of others. If you succeed, then I fail.	Finds lessons & inspiration in other people's success.
RESULT...	Plateau early, achieve less than my full potential.	Reach ever-higher levels of achievement.

Growth Mindset

Intelligence can be developed

Leads to a desire to learn
and therefore a tendency to...

People who hold the Growth Mindset believe that intelligence can be developed, that the brain is like a muscle that can be trained. This leads to the desire to improve.

...embrace challenges

And how do you improve? First, you embrace challenges, because you know that you'll come out stronger on the other side.

...persist in the face of setbacks

Similarly, obstacles - external setbacks - do not discourage you. Your self-image is not tied to your success and how you will look to others; failure is an opportunity to learn, and so whatever happens you win.

...see effort as the path to mastery

Effort is seen not as something useless to be avoided but as necessary to grow and master useful skills.

...learn from criticism

Criticism and negative feedback are sources of information. That doesn't mean that all criticism is worth integrating or that nothing is never taken personally, but at least the Growth Mindset individual knows that he or she can change and improve, so the negative feedback is not perceived as being directly about them as a person, but rather about their current abilities.

...find lessons and inspiration in the success of others

The success of others is seen as a source of inspiration and information. To Growth Mindset individuals, success is not seen as a zero-sum game.

As a result, they reach ever-higher levels of achievement.

All this gives them a greater sense of free will

THE SCIENCE OF MINDSET

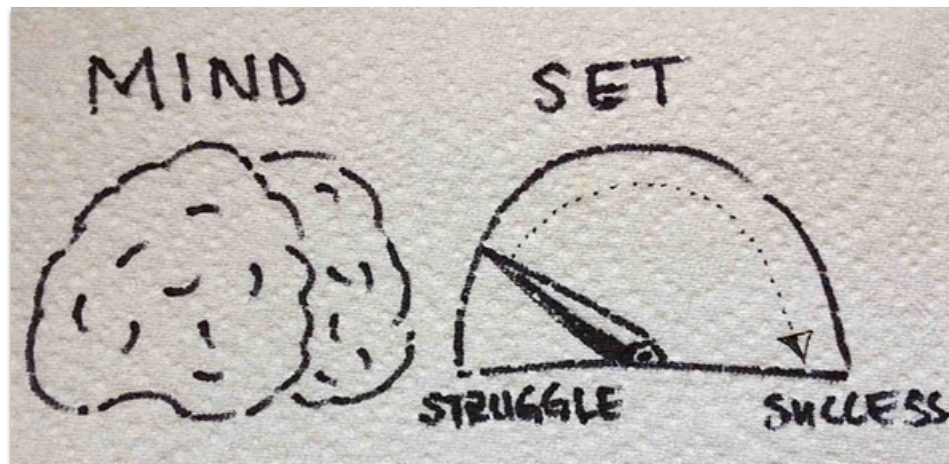

According to Wallace Wattles, there is a “science” to Mindset, which anyone can use to bring success into their lives.

“Success in life is becoming what you want to be.

You can get everything you want by beginning in your present business and in your present location to do things in a Certain Way which causes success.”

—Wallace D. Wattles

THE SCIENCE OF MINDSET

The Science of Getting Rich was published over 100 years ago by Wallace D. Wattles. In this highly coveted text, he explains the scientific process for assuring wealth and success.

"The ownership of money and property comes as a result of doing things in a certain way. Those who do things in this certain way, whether on purpose or accidentally, get rich. Those who do not do things in this certain way, no matter how hard they work or how able they are, remain poor."

"It is a natural law that like causes always produce like effects. Therefore, any man or woman who learns to do things in this certain way will infallibly get rich."

— The Science of Getting Rich

THE SCIENCE OF MINDSET

So What's the Secret?

"Man can form things in his thought, and, by impressing his thought upon formless substance, can cause the thing he thinks about to be created."

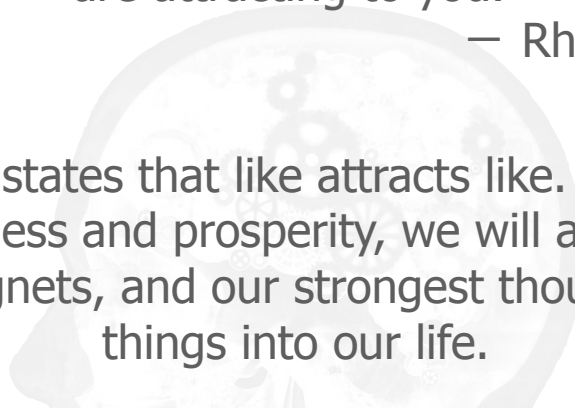

— The Science of Getting Rich

In essence, our predominant thoughts create our future reality.

"Everything that's coming into your life you are attracting into your life. And it's attracted to you by virtue of the images you're holding in your mind. It's what you're thinking. Whatever is going on in your mind you are attracting to you."

— Rhonda Byrne, The Secret

The law of attraction states that like attracts like. So if our predominant thoughts are of happiness and prosperity, we will attract those things. Our thoughts are like magnets, and our strongest thoughts will attract those things into our life.

THE SCIENCE OF MINDSET

3 Steps to Using the “Science” of Mindset

STEP 1: Form a clear mental vision of your wants and dreams, without limits.

STEP 2: Work purposefully toward your vision with steadfast faith and gratitude.

STEP 3: Live in the present as if you’ve already achieved your vision.

THE SCIENCE OF MINDSET

STEP 1: Form a clear mental vision of your wants and dreams, without limits.

Visualization

"Man is a thinking center, and can originate thought. All the forms that man fashions with his hands must first exist in his thought; he cannot shape a thing until he has thought that thing."

— The Science of Getting Rich

Visualization has been used for thousands of years to turn our thoughts into reality. Our present reality is a result of our predominant thoughts.

If our predominant thoughts are filled with dreams of success and prosperity, those things will be drawn to us.

It's the universal law of attraction!

THE SCIENCE OF MINDSET

STEP 1: Form a clear mental vision of your wants and dreams, without limits.

Visualize Every Detail, and Fixate

"You must form a clear and definite mental picture of what you want; you cannot transmit an idea unless you have it yourself. The more clear and definite you make your picture then, and the more you dwell upon it, bringing out all its delightful details, the stronger your desire will be; and the stronger your desire, the easier it will be to hold your mind fixed upon the picture of what you want."

— The Science of Getting Rich

THE SCIENCE OF MINDSET

STEP 1: Form a clear mental vision of your wants and dreams, without limits.

Practice Visualization

"It should be the work of your leisure hours to use your imagination on the details of your vision, and to contemplate them until they are firmly fixed upon memory. If you wish speedy results, spend practically all your spare time in this practice."

- Visualize without limits
- The clearer the details, the more powerful the mental transmission
- Visualize anything you want, no matter how small or large
- Practice visualization throughout the day, whether you're building your future, or just preparing for an upcoming trade.

THE SCIENCE OF MINDSET

STEP 1: Form a clear mental vision of your wants and dreams, without limits.

Create Your Trader Superhero

Before you can become the trader you want to be, you must first create your vision of the trader you want to be, and then begin emulating the future you in the present.

Do the things that future you would do today, and avoid doing those things that keep you from your vision.

THE SCIENCE OF MINDSET

STEP 1: Form a clear mental vision of your wants and dreams, without limits.

Create Your Trader Superhero

Give the future you a trader superhero name. Mine is PivotBoss. I created PivotBoss to help me become the trader that I wanted to be years ago. When I trade, I trade as PivotBoss, the Superhero Trader. PivotBoss executes his bias according to his trading plan, and does so with confidence. I trade as PivotBoss would trade.

THE SCIENCE OF MINDSET

STEP 1: Form a clear mental vision of your wants and dreams, without limits.

Create Your Trader Superhero

"He must form a clear mental picture of the things he wants, and do, with faith and purpose, all that can be done each day, doing each separate thing in an efficient manner."

— The Science of Getting Rich

In essence, form your mental picture of the elite trader that you want to become, and then begin emulating your vision immediately. Continue on this path with the unwavering belief that you will fulfill your ultimate vision.

THE SCIENCE OF MINDSET

STEP 1: Form a clear mental vision of your wants and dreams, without limits.

Begin Emulating Your Trader Superhero Today

- If future you catalogs every trade in a daily trading journal, then begin journaling now
- If future you always executes trades according to plan, then stick to your plan now
- If future you exercises during the lunch time doldrums, then begin exercising now
- If future you meditates every morning before trading, then begin meditating now

THE SCIENCE OF MINDSET

STEP 1: Form a clear mental vision of your wants and dreams, without limits.

Begin Emulating Your Trader Superhero Today

"Act now. There is never any time but now, and there never will be any time but now. If you are ever to begin to make ready for the reception of what you want, you must begin now."

— The Science of Getting Rich

THE SCIENCE OF MINDSET

STEP 2: Work purposefully toward your vision with steadfast faith and gratitude.

ACTION. FAITH. GRATITUDE.

Once you've created your vision, it's time to work proactively toward your vision.

Action, faith, and gratitude separates dreamers from achievers.

ACTION: You must proactively make progress toward your vision.

FAITH: You must fully BELIEVE that you will attain your vision.

GRATITUDE: You must be grateful in your current circumstance.

THE SCIENCE OF MINDSET

STEP 2: Work purposefully toward your vision with steadfast faith and gratitude.

Action: You must proactively make progress toward your vision.

THE SCIENCE OF MINDSET

STEP 2: Work purposefully toward your vision with steadfast faith and gratitude.

Faith: You must fully BELIEVE that you will attain your vision.

Goals, dreams, and visions are fulfilled by those who wholeheartedly believe, with steadfast faith, that they will eventually attain them.

"To think health when surrounded by the appearances of disease, or to think riches when in the midst of appearances of poverty, requires power; but he who acquires this power becomes a MASTER MIND. He can conquer fate; he can have whatever he wants."

— The Science of Getting Rich

THE SCIENCE OF MINDSET

STEP 2: Work purposefully toward your vision with steadfast faith and gratitude.

Gratitude: You must be grateful in your current circumstance.

"There is a Law of Gratitude, and it is absolutely necessary that you should observe the law, if you are to get the results you seek."

"The grateful mind is constantly fixed upon the best; therefore it tends to become the best; it takes the form or character of the best, and will receive the best."

"To permit your mind to dwell upon the inferior is to become inferior and to surround yourself with inferior things."

— The Science of Getting Rich

THE SCIENCE OF MINDSET

STEP 3: Live in the present as if you've already achieved your vision.

The Power of Positive Mindset

Since the Law of Attraction states that you receive what you transmit, you must begin to transmit feelings of happiness and success now, which are the feelings that you will also feel once you've achieved your ultimate goals.

"Do not wait for a change of environment, before you act; get a change of environment by action. You can so act upon the environment in which you are now, as to cause yourself to be transferred to a better environment."

THE SCIENCE OF MINDSET

STEP 3: Live in the present as if you've already achieved your vision.

The Power of Positive Mindset

"Behind your clear vision must be the purpose to realize it; to bring it out in tangible expression. And behind this purpose must be an invincible and unwavering FAITH that the thing is already yours; that it is "at hand" and you have only to take possession of it."

"You cannot retain a true and clear vision of wealth if you are constantly turning your attention to opposing pictures, whether they be external or imaginary. Guard your speech. Never speak of yourself, your affairs, or of anything else in a discouraged or discouraging way."

THE SCIENCE OF MINDSET

- Mindset is paramount to success
- A Growth Mindset leads to success
- There is a "Science" to Mindset:
 1. Step 1: Form a clear mental vision of your wants and dreams, without limits.
 2. Step 2: Work purposefully toward your vision with steadfast faith and gratitude.
 3. Step 3: Live in the present as if you've already achieved your vision.

"Act now. There is never any time but now, and there never will be any time but now. If you are ever to begin to make ready for the reception of what you want, you must begin now."
